## THE NOSE A FILTER TO STRAIN THE AIR

### Catarrh Clogged Nostrils A Breeding Place for Deadly Germs

The nostrils are perfect "air filters" and, when kept in clean, healthy state, straining every bit of air we breathe, catching all dust particles, foreign matter and germs. The air is full of germs. You cannot dodge them, but you can safe-guard yourself against catarrh and other diseases contracted in the process of breathing by keeping the nostrils clean and healthy. Catarrh germs will sometimes get in their work, and you may mistake the symptoms for an ordinary cold.

Don't take any chances. If you have a stuffed up feeling in the head, or if your throat is sore or filled with phlegm, just grease the nostrils with a little Ely's Cream Balm, draw the pure, aromatic fumes back in the head, and you will be astonished at the effect. In a few minutes you will feel a loosening up in the head, the nasty discharge will soon be stopped, the soreness gone, and you will feel a sense of genuine relief.

Ely's Cream Balm not only wards off catarrh, but will quickly cure even a chronic, long-standing case of catarrh. It takes the trouble right where it starts, in the nose and throat, cleanses, heals and strengthens the raw, sore inside skin, or membrane, and in this way drives out catarrh and makes you proof against this filthy, disgusting disease.

Colds, which often hang on for weeks, can be quickly cured with this cleansing, healing, and soothing balm. All druggists sell it for fifty cents a bottle, and the one bottle is generally all that is needed to effect a complete cure. Try it today. Agent, T. H. Carr. (Advertisement)

#### WHEN MEAT IS HIGH.

"What do you call this?"  
"A hamburger steak, sir?"  
"Hamburger steak? H'm! From the size of it I should say it is a hamburger steak."

#### THAT'S SO.

"There is no use in worrying."  
"But if you don't you have no excuse for joining a 'Don't Worry Club.'"

## SALT LAKE ENGINEERS TO SERVE ON MOTORS

Changes to be made immediately by the Denver & Rio Grande railroad, including the construction of a new and easier line over Soldier Summit and the electrification of the road between Helper and Ogden have been subjects for no little speculation among the many employees in the operating department of the railroad, inasmuch as they are the ones who will likely be most affected. Engineers and firemen, however, are practically assured that their positions will be safe while the trainmen are losing little sleep through fear that positions will be left vacant through the changes.

The chief reason for the assurance of the engineers and firemen lies in the fact that the board of arbitration which settled the differences between the Brotherhood of Locomotive Engineers and the eastern railroads this week took notice of the changes from steam to electricity and decided that the engineers should have first preference as motormen on lines operating their own motors. The question of wages for the operation of the electric motors was not decided further than to rule that the minimum wage for the operation of steam locomotives should be in force.

**Recent Changes.**  
With reference to electric service, one point on which the railroads laid much stress in the hearings before the board, the decision says, "Since the use of electric locomotives or multiple unit trains upon steam railways is in its early stage of development, and there is as yet no approximation to stable conditions, but a wide variation in existing practices, the board was unable, from the evidence before it, to make any uniform rules regulating rates of pay and conditions of service for engineers or motormen employed on such trains." In other words, no change is made in existing working rules and conditions, though the minimum day's wage of \$125 in passenger service is awarded to the engineers.

With reference to the right of engineers to man electric service the board says: "Wherever electric service is installed as a substitute for steam, for is now in operation on any of the railroads parties to this arbitration, or on any of the tracks operated or controlled by any of them as part of their system, the locomotive engineers shall have the preference for the positions of engineers or motormen on electric locomotives or multiple unit trains, but this right of the engineers shall not operate to displace any man operating electric power on any of the railroads parties to the agreement on May 1, 1912."

**Contention Upheld.**  
This decision, containing as it does the words "as part of their system," would seem to uphold the principal contention of the railroads in this

matter in that the carriers argued that while it was their practice to give preference to the locomotive engineers in choosing men for engineers and motormen on electric locomotives or multiple unit trains, they did not want to be prevented from making any contractual relations from time to time in leasing properties, by being obligated to guarantee employment to the engineers who might be employed on the line leased either to or from some other party.

## MYSTERY ATTENDS FINDING OF BODY

Salt Lake, Nov. 29.—Murder, robbery and a desperate attempt to spirit away a corpse, growing into evidence of crimes are thought to be indicated by the discovery made yesterday on the shores of Great Salt Lake when four youths hunting rabbits stumbled upon the dead body of Joseph Evans, 40 years old, former gardener for J. J. Daly, 319 East South Temple street.

Evans inherited \$4000 last July from the estate of his brother Chas. Evans who died at Santa Monica, Cal., under mysterious circumstances. Receiving his share of the estate Evans quit the employment of Mr. Daly and announced he would go to Wales, his native home, to pass the rest of his life in comfort.

The gardener was last seen Labor day by Frank C. Lovesey, a letter carrier residing at the Ozark apartments. Evans then is said to have announced his intention of leaving for Wales in a few days. He asked Lovesey for his address. The letter carrier gave him an envelope which had been addressed him from a New York clothing house. This envelope was found yesterday near the dead body of Evans, leading to discovery of his identity.

**Found by Hunters.**  
The four youths who found the body are Walter E. Perry, 249 Belmont avenue, Clifford Zimmerman, 323 South Eighth East street, Edwin Hennefer, 1480 Fourth East street, and Ephraim May, 548 South First West street. They were hunting in the brush along the shore of the lake, about seven miles north of Salt Lake, when they stumbled upon the decomposed body of a man hidden in salt grass.

For several moments the youthful hunters gazed at the body, then one of their number walked to its side to make an investigation. So badly was the body decomposed that they could not ascertain if the man had been the victim of foul play. Lying close to the hand of the dead man was an envelope bearing the address, "Frank C. Lovesey, No. 12 Ozark apartments." They took possession of the envelope and hurried toward the city to report the discovery to authorities, carrying in their memory a description of the dead man.

**SUDDEN DEATH OF  
YOUNG CIVIL ENGINEER**  
Salt Lake, Nov. 29.—Under mysterious circumstances, George Q. Hoover, a young civil engineer just in for the holidays from a surveying expedition at Thistle, dropped dead suddenly at 2:15 yesterday afternoon at the Kenyon hotel.

Hoover, a young man of 27 years, left the home of his aunt, Mrs. Elizabeth Houghton, 911 Third avenue, at 1:30 o'clock to attend the football game. He appeared to be in perfect health and unusually cheerful and announced his intention of going down town before journeying to Cummings field. His entrance into the Kenyon

was casual and nobody noticed him till he suddenly fell forward while in the wash room. It is believed he died instantly. Two Brigham City men, one of them J. D. Call, bent over the prostrate man and then summoned Dr. P. P. Musser, who found the body warm and lifelike and worked over it nearly an hour in the hope that life might still exist. It is believed that Hoover's death may have been caused by heart failure, but no previous symptoms of such a disease had been noted by his relatives, and, as sudden heart failure without previous pathological symptoms is rare, the case is a puzzling one to physicians.

No mark or trace of a possible poison was found in his mouth or throat. A bottle filled with some liquid was discovered by Dr. Musser within three feet of where young Hoover lay, but detectives present did not believe that Hoover swallowed it and claimed it to be a part of the equipment of the Kenyon hotel. An autopsy may be held today by the county authorities. The body is now at the O'Donnell undertaking establishment.

**FORMER BISHOP BARTON  
OF KAYSVILLE IS DEAD**  
Salt Lake, Nov. 29.—Peter Barton, for 30 years bishop of Kaysville ward, president of the Kaysville Milling company and director of the Bankers' Banking company of Kaysville, died at 2:10 o'clock yesterday afternoon at his residence, 282 Canyon road.

Leakage of the heart was the cause of death. His last illness had been of but one week's duration. Bishop Barton was in his 68th year. Since the day Mr. Barton arrived in Kaysville with one of the ox team companies in 1862 he had centered interest in the upbuilding of home industries in that settlement. He organized the Kaysville Canning company, the Kaysville Mercantile company, and assisted in the organization of the bank. As a church worker he won high praise and his administration as Bishop of Kaysville ward was attended by unusual progress.

**WIFE WHO STABBED  
HERSELF IS DEAD**  
Salt Lake, Nov. 29.—Thanksgiving day brought an end to the sufferings of Mrs. Gertrude Bircumshaw Winter, the demented and heartbroken mother whose grief for her dead children prompted her to slash herself terribly in an insane effort to prove that her children still lived. Mrs. Winter died at the residence of her parents, Mr. and Mrs. Thomas Bircumshaw, 685 Wall street, at 4:30 o'clock yesterday afternoon.

This afternoon the funeral of the

# SPECIALS FOR SATURDAY A SHOWER OF BARGAINS SILKS AND DRESS GOODS

NEVER HAVE SUCH QUALITY BARGAINS BEEN OFFERED IN THIS CITY. FRIDAY AND SATURDAY WILL SEE THE CLOSE OF THIS SILK AND DRESS GOODS SALE. IF YOU HAVE NOT BEEN FORTUNATE ENOUGH TO VISIT THE STORE AND MAKE PURCHASES, YOU STILL HAVE TODAY AND TOMORROW TO MAKE THE SELECTION. WE ADVISE YOU TO COME TODAY.

WE INVITE YOU TO THIS SALE BECAUSE IT IS WORTH YOUR WHILE.

# BURTS'

mother and the daughter, Priscilla Fenneta Winter, will be held. Both will be buried at the City cemetery this afternoon at 4 o'clock. The funeral will be private and only a brief service will be held at the cemetery. Because of the fact that the residence is under quarantine for scarlet fever, which caused the death of the little daughter, there will be no service at the house.

**Parise This Remedy  
For Lung Trouble**  
If the voluntarily written words of grateful people, living in all parts of the country, praising Eckman's Alternative, a remedy for the treatment of coughs, colds, throat and lung troubles, are to be believed, this medicine is certainly doing a vast amount of good for such sufferers. We state none but facts and give to you the names and words of praise of those who declare it benefited them—in many cases coupled with the writers' statements that it restored them to health. This is a sample taken from many:

St. Mary's Academy, O'Neill, Neb.  
"Gentlemen: About seven years ago, I was attacked with the dreaded disease, Tuberculosis. I coughed incessantly, could not sleep nor eat, even could not speak out loud and could do no work. I had three hemorrhages, raised blood most of the time and suffered with night sweats, fever and chills. A specialist of Columbus, Ohio, pronounced my case hopeless.

"Nearly five years ago, I heard of your Alternative and procured some at once, with the result that I soon found myself restored to health. For the past four years I have been able to continue my teaching and though I have always had heavy school work, I am also able to perform much manual labor. I consider your medicine, if faithfully taken, a most excellent remedy for consumption. Mother Superior permits this testimonial."

(Signed) SISTERS MARIE.  
Eckman's Alternative is effective in Bronchitis, Asthma, Hay Fever, Throat and Lung Troubles and in upbuilding the system. Does not contain poisons, opiates or habit-forming drugs. For sale by The Cave Drug Co., Marshall Drug Co., Culley Drug Co., A. R. McIntyre, T. H. Carr and other leading druggists. Ask for booklet telling of recoveries, and write to Eckman Laboratory, Philadelphia, Pa. for additional evidence. (Advertisement)

**FEW DIE IN UTAH  
FROM TUBERCULOSIS**  
Utah can boast of the lowest death rate from tuberculosis in the world. The state's freedom from the white plague is emphasized in a circular issued by the state board of health yesterday to health officers.

Only 31 in every 100,000 of population dies of consumption in Utah annually. The rate for the whole United States is 161 in every 100,000. Following is the circular, prepared by Dr. T. B. Beatty, secretary of the board, who will again try to have the legislature appropriate money for a state sanitarium for treating patients afflicted with this disease.

Tuberculosis is a contagious disease communicated directly or indirectly by a person affected therewith. If the consumption is latent it is careful in the observance of precautions he will not endanger others. If no care is used he will inevitably menace the lives of all with whom he comes in contact, and it is as a result of such carelessness that the terrible malady has become the most destructive of all diseases.

In order that the efforts of health boards to restrict the spread of tuberculosis may be effective, notification of its presence must be furnished as in other contagious diseases. Utah was the first state in the Union to enact a law requiring physicians and others to report all cases of tuberculosis, but it is to be regretted that compliance with the law has been far from satisfactory, notwithstanding the continued efforts of the state board of health to enforce it.

Health officers should more fully recognize the importance of the measure, and public senti-
